

Construction Worker Jeopardy Game Lesson Plan

This Jeopardy style game helps show the many skills and jobs needed to make a major building. Clues give activities associated with a particular job, and student answers supply the type of worker. This class would be a good resource to use before visiting the Minnesota State Capitol building.

***Note: you must have a free account with Smart Exchange in order to access this game. You can go to Smart Exchange and type "Who Built Our Capitol?" into the search box. Check with your teacher to see and play the game.**

How to play:

1. Students split into two or more large groups or into several smaller groups of 2-5 students.
2. A player from each group takes a turn, first picking a category and a point value from the board.
3. Player clicks on the box he or she picked to read the question.
4. Student must give the answer in the form of a question, in the Jeopardy game format. For example, "What does a bricklayer do?"
5. To see if a student or group is correct, click the "Answer" button.
6. Click the "Back" button to return to the main board.
7. If the player or team is correct, they are awarded the point value of the question.
8. Continue until all questions have been answered. At this point, final scores can be tallied. The team with the most points wins.
